

PROFILE	Affiliation: University of Oxford Email: richard.stiskalek@physics.ox.ac.uk NASA ADS: 16 first-author, 15 co-author papers; <i>h</i>-index = 11; citations = 736 Website: richard-sti.github.io I am a Hintze Prize Fellow in Astrophysics (Cosmology) and specialise in Bayesian field-level inference and digital twins of the local Universe to bridge observations and theory. My research combines constrained cosmological simulations, semi-analytic galaxy formation models, simulation-based inference, and machine learning to test galaxy physics, map large-scale flows, and deliver precision measurements of cosmological parameters.
EDUCATION	University of Oxford (Balliol College), DPhil in Astrophysics 2022 – 2026 Thesis: “Constrained Simulations of the Local Universe as a Laboratory for Precision Cosmology and Astrophysics” Supervised by <i>Harry Desmond</i>, <i>Julien Devriendt</i>, and <i>Adrianne Slyz</i> Ludwig-Maximilians-Universität München, MSc in Physics 2020 – 2022 Thesis: “Strong-field lensing of gravitational waves” (partially with <i>Albert Einstein Institute Potsdam</i>) Supervised by <i>Miguel Zumalacárregui</i>, <i>Marius A. Oancea</i>, and <i>Jochen Weller</i> Hong Kong University of Science and Technology 2017 – 2018 Undergraduate Exchange Programme in Physics University of Glasgow, BSc in Physics with Astrophysics 2016 – 2020 Thesis: “Gravitational-wave cosmology” Supervised by <i>Martin Hendry</i>
ACADEMIC APPOINTMENTS	University of Oxford, Hintze Centre for Astrophysical Surveys 2026 – 2029 Hintze Prize Fellow in Astrophysics (Cosmology) Flatiron Institute, Center for Computational Astrophysics 2025 Pre-Doctoral Fellow (with <i>Shy Genel</i> and <i>Lucia A. Perez</i>) Institut d’astrophysique de Paris 2024 Long Term Attachment (with <i>Guilhem Lavaux</i>) Max Planck Institute for Gravitational Physics, Observational Relativity and Cosmology 2020 Summer Research Intern (with <i>Collin Capano</i>) University of Oxford, Sub-department of Astrophysics 2019 Summer Research Intern (with <i>Harry Desmond</i>) University of Glasgow, Institute for Gravitational Research 2018 Summer Research Intern (with <i>John Veitch</i> and <i>Chris Messenger</i>)
COLLABORATION MEMBERSHIPS	Learning the Universe 2025 – present Simons Foundation collaboration developing next-generation cosmological simulations, machine learning methods, and advanced Bayesian inference for large-scale surveys <i>Contributions:</i> Training set generation and BORG team CAMELS 2025 – present Collaboration building large public suites of cosmological hydrodynamical and <i>N</i>-body simulations spanning broad cosmological and astrophysical parameter ranges to train and test machine learning methods <i>Contributions:</i> Leading projects on semi-analytic modelling and simulation-based inference Aquila Consortium 2022 – present International collaboration developing Bayesian field-level inference techniques to reconstruct initial conditions and study large-scale structure formation <i>Contributions:</i> Leading projects on data generation, benchmarking, large-scale flows and cosmological parameters

TEACHING, MENTORING & SERVICE	Student Supervision	
	<i>Noah Pierce</i> (BSc, Southampton; with H. Desmond & T. Yasin) “Field-Level Inference of the Galaxy Luminosity Function”	2025 – present
	<i>Joshua Darne</i> (MPhys, Oxford; with T. Yasin & H. Desmond) “Radial acceleration relation in the NewHorizon hydrodynamical simulation”	2024
	<i>Fedir Boreiko</i> (BSc, Manchester; with T. Yasin & H. Desmond) “The correlation between light and dark matter across cosmic time” [arXiv:2601.07799]	2024
	<i>Enoch Ko</i> (BSc, Warwick; with T. Yasin & H. Desmond) “Dark matter and galaxy dynamics: enduring puzzles” [arXiv:2508.03569]	2024
	<i>Catherine Gallagher</i> (MPhys, Oxford; with T. Yasin & H. Desmond) “The influence of cosmic environment on galaxy properties” [arXiv:2503.14732]	2023 – 2024
	<i>James Harvey</i> (BSc, Oxford; with T. Yasin & H. Desmond) “Machine learning the time of last major merger from spectroscopic data”	2023 – 2024
	Teaching Experience	
	Tutor, <i>MPhys C1 Astrophysics</i> , University of Oxford Graduate tutorials in cosmology and stellar astrophysics	2023 – 2024
	Mentor, <i>Lumiere Education</i> Supervision of senior high school students carrying out independent research projects	2023 – present
	Demonstrator, <i>3rd-Year Practical Course</i> , University of Oxford Computational astrophysics practical sessions	2023
	Academic Service	
	Referee for <i>A&A</i> , <i>ApJ</i> , <i>MNRAS</i> , <i>OJA</i> , <i>PNAS</i> , and <i>PRD</i> Reviewed 20+ manuscripts for leading journals	2022 – present
SELECTED AWARDS AND SCHOLARSHIPS	Coordinator, Aquila Consortium Monthly Telecon Organiser, “Simulator’s Coffee”, University of Oxford	2023 – present 2023 – 2024
	Local organiser, Aquila Consortium Oxford Meeting	2023
	Lead organiser, “Middle of Scotland Science Festival”	2018
	Hintze Prize Fellowship in Astrophysics (Cosmology), University of Oxford	2026
	Flatiron Research Fellowship, Flatiron Institute (declined)	2026
	Junior Research Fellowship, Emmanuel College, Cambridge (declined)	2026
	Snell Exhibition, Balliol College	2022 – 2026
	STFC PhD Funding, Science and Technology Facilities Council	2022 – 2026
	DAAD Study Scholarship, German Academic Exchange Service	2021 – 2022
	Kerr Bursary, University of Glasgow	2020
	Lang Scholarship, University of Glasgow	2019
	Undergraduate Summer Bursary, Royal Astronomical Society	2018
	Dean’s List, Hong Kong University of Science and Technology	2018
	Astronomy 1 Prize, University of Glasgow	2017
SKILLS	Matthew A. Muir Bursary, University of Glasgow	2017
	South East Asia Study Abroad Scholarship, University of Glasgow	2017 – 2018
	Programming: Python, Julia, C/C++, Fortran; high-performance computing (MPI, GPU acceleration)	
	Statistics & Machine Learning: Bayesian inference (NumPyro/JAX, PyMC, Stan), simulation-based inference, density estimation; deep learning (MLPs, CNNs, GNNs, normalising flows) with JAX, TensorFlow, PyTorch; tree-based methods (random forests, gradient boosting) with scikit-learn	
	Astrophysics Software: RAMSES, AREPO, Gadget, Rockstar, DisPerSe; <i>N</i> -body/hydrodynamical simulation analysis	
	Languages: English (fluent), Czech (native), Slovak (fluent), French (intermediate), German (beginner)
